**WARNING**

- It is not possible within the scope of these instructions to fully acquaint the installer with all the knowledge of electrical systems that may be necessary to correctly install this product. If the installer is not knowledgeable in electrical systems we recommend that an electrical professional be retained to make the installation.
- If either the panel front or back is to be exposed to water it must be protected with a waterproof shield.
- The panels must not be installed in explosive environments such as gasoline engine rooms or battery compartments as the circuit breakers are not ignition proof.
- The main positive connection must be disconnected at the battery post to avoid the possibility of a short circuit during the installation of this distribution panel.

Guarantee

Any Blue Sea Systems product with which a customer is not satisfied may be returned for a refund or replacement at any time.

Useful Reference Books

Installation

1. Use 16 AWG wire
2. Fuse all positive connections
3. Connect to meter terminals
   1. Negative
   2. Power 7-60V DC (House)
   3. Voltage Sense (VMTR+)
   4. Do Not Use
   5. Do Not Use
   6. Do Not Use
4. Connect to source 1, 2, and 3
5. See meter operation manual
