Monitors DC current on a bright, waterproof, daylight readable OLED screen.

Features
- Measures current on the positive or negative side
- Compact size
- Displays temperature in Fahrenheit or Celsius
- Reverse polarity protected
- Mounts in a common 1-1/8 inch hole

Specifications
Nominal Voltage 12V / 24V DC
Voltage Range 8V–36V DC
Maximum Operating Current 15mA
Resolution 0.1A
Accuracy +/- 2%
Cutout Dimensions 1-1/8” (29mm) diameter
Shunt (included) 1x 9230 (100A/50mV)
Intermittent: 5 min. 110A
Cranking: 30 sec. 175A

Regulatory
CE marked
Meter face is IP66 - protected against powerful water jets

NOTE: The diagrams are intended for reference only. Consult an ABYC certified marine electrical professional for system design and circuit protection.
