**Instructions**

**WeatherDeck® Waterproof Switch Only Panels**  
PN 4303 / PN 4305 / PN 4307 / PN 4309

*For use where circuit protection is located off the panel*

- Does not include circuit protection or backlighting
- Integrated switch guards reduce the risk of accidental switching
- Panels can be mounted in four different orientations
- Panel front rated waterproof IP67 when properly mounted with the watertight mounting gasket
- UV stabilized weather-resistant faceplate snaps on and off providing access to components and concealing mounting screws
- Square Format Label Set PN 4215 included

---

**Specifications**

- **Maximum Operating Voltage**: 24V DC  
- **Maximum Operating Amperage**: 15A (per circuit)  
- **Panel Cumulative Rating**: 30A (PN 4303)  
  45A (PN 4305, PN 4307, PN 4309)  
- **Switch Rating**: 15A maximum  
- **Material**:  
  - Cover: UV Resistant Thermoplastic  
  - Panel: UL-V0 Flame Resistant Thermoplastic

**Regulatory**

Waterproof IP67—Protected against immersion up to 1 meter for 30 minutes

---

**Installation**

**CAUTION** symbol refers to a potentially hazardous situation which, if not avoided, may result in minor or moderate injury.

**WARNING** symbol refers to a potentially hazardous situation which, if not avoided, could result in death or serious injury.

---

**GUARANTEE**: Blue Sea Systems stands behind its products for as long as you own them. Find detailed information at www.bluesea.com/about. For customer service, call 800-222-7617.

---

1. Before beginning electrical installation, disconnect all AC and DC power sources.

2. Select mounting location and panel orientation away from flammable areas. Panel can be mounted in any of the four orientations shown below.

3. Cut opening with template provided.
Installation (continued)

4. To remove cover, apply heel of hand to label area and pull back on the cover edge.

5. Apply voltage label and circuit labels.

6. Make connections as per diagram below.
   a. Connect +12V DC or 24V DC to the 12 AWG wire supply harness (Bus). Use adequate gauge supply wire and circuit protection for safe operation up to Panel Cumulative Rating.
   b. Connect positive side of each appliance to a switch output terminal. Connect the negative side to DC negative.

7. Check that toggle switch boots are securely tightened.

8. Mount panel in cutout with provided gasket and screws.

Application Example

WeatherDeck® Switch Only Panel with ST-Blade Independent Circuit Fuse Block

Legend
- DC Positive
- DC Negative

Example Devices
- STEREO
- HORN
- GPS
- FISH FINDER
- BILGE PUMP
- VHF

Legend
- FUSE
- CIRCUIT BREAKER
- WIRE HARNESS (BUS)
